SUMMARY

Product Designer with 4 years in product design and 7+ years in design overall, owning design across the full product lifecycle, from discovery and conceptualization to final implementation and polish, on complex B2B SaaS platforms and internal tools with many flows, states and feature dependencies. I translate ambitious business and user problems into intuitive, user-centered solutions, and I rationalize every decision with data, research insights and direct customer feedback. I contribute to and maintain scalable design systems that keep the whole interface consistent, run usability testing, user feedback loops and data-driven experimentation, and collaborate tightly in cross-functional squads with PMs, engineers and analysts. I am AI-native: I design AI-powered UX and Copilot-style features, and because I write frontend (Next.js) my prototypes are real and my handoff is buildable. Curious, pragmatic, and a consistently high bar for craft. Berlin-based, open to hybrid across the EU.

EXPERIENCE

Product Designer — Duo Sicilian Ice Cream Oct 2024 — Present

Berlin, Germany · On-site

- Designed and shipped Duo's internal ERP from zero — a complex platform (13 modules, 40+ document types, 6 permission roles) in daily use across 9 locations and 6 departments, owning the full lifecycle from discovery to final implementation and polish.
- Shipped 13 interdependent modules (inventory, orders, deliveries, logistics GPS, suppliers, production, staff, reports and more) — translating operational goals into intuitive, user-centered flows, wireframes, high-fidelity mockups and interactive prototypes.
- Designed a role-based access model with 6 distinct roles; transformed onboarding UX, cutting onboarding time by ~30% and eliminating accidental cross-module edits.
- Built a three-state status system (ok / warn / critical) applied consistently across inventory, expiring items, HR compliance, deliveries and production.
- Contribute to and maintain a scalable design system (components, patterns, design tokens); run usability testing, user feedback loops and data-driven experimentation with real users to rationalize every decision.
- Design AI-powered UX and Copilot-style features, collaborating with engineering to scope, prioritize and define outcomes; I write frontend (Next.js) so prototypes are real and handoff is buildable.

Product Designer — TaurusWebs (Freelance) Feb 2019 — Present

Bogotá, Colombia · Remote · User Experience Designer (2019 – 2022) → Junior Product Designer (2022 – 2024) → Product Designer (2024 – Present)

- Owned end-to-end design of complex B2B platforms and commercial apps, from discovery and flows to high-fidelity UI and interactive prototypes across web and mobile.
- Designed the Taurus Ecosystem: a unified workspace integrating CRM, knowledge base and chat via single sign-on (SSO), with a scalable shared design system.
- Worked in cross-functional collaboration with engineers and stakeholders, rationalizing design decisions and defining outcomes together.

Senior Graphic Designer / Lead Designer — Greens Group Aug 2019 — Nov 2023

Greens Supermarket · Fresh To Go · Blok Foods — Swieqi, Malta · On-site

- Led visual identity and digital design across three brands, holding a consistently high bar for quality and craft. Promoted Graphic Designer to Senior; Lead Designer on contract for Blok Foods (2022–2023).
- Built and maintained a multi-channel design system from the ground up for a multi-person team.

EDUCATION

MA Visual & Experience Design — UE University of Applied Sciences, Berlin (consumer mobile app thesis) 2025

BA Marketing & Advertising — Politécnico Granacolombiano, Bogotá 2019

SKILLS

PROCESS	Full-lifecycle Ownership (discovery → polish) · User Flows · Wireframes · High-fidelity Mockups · Interactive Prototypes · Scope, Prioritize & Define Outcomes
COMPLEX UX	Complex Platforms · Multiple Flows, States & Feature Dependencies · Onboarding UX · Modular / Pricing Flows · Turning Ambitious Goals into Elegant, User-centered UX
SYSTEMS	Scalable Design Systems · Components · Patterns · Design Tokens · UI Consistency at Scale
RESEARCH	Usability Testing · User Feedback Loops · Data-driven Experimentation · Design Rationale (data + research + customer feedback) · Human Behaviour · Metrics
AI / BUILD	AI-powered UX · Copilot-style Features · Claude Code · Gemini · NotebookLM · HTML · CSS · JavaScript · Next.js · Figma · FigJam
DOMAINS	B2B SaaS · Internal Tools · ERP Systems · Financial / Operational Tooling · Invoicing & Accounting-adjacent Workflows · Cross-functional Squads (PM, Eng, Analysts)
