SUMMARY

Product Designer with 4 years in product and 8+ years in design overall, designing complex, data-rich B2B software end to end. Sole product designer of an in-house ERP that runs a 9-location hospitality group: 13 modules, 6 roles and 40+ document types. I own product areas from discovery to shipped interactions: user interviews, usability tests and product data first, then flows, high-fidelity interfaces and outcomes measured after launch. I build design systems in Figma and in code and prototype at high fidelity with Claude Code, including AI-powered features, backed by a BA in Marketing and Advertising and an MA in Visual and Experience Design.

EXPERIENCE

Duo Sicilian Ice Cream, Product Designer

Berlin, Germany / On-site / October 2024 - Present

- Sole product designer, with no design team and no product manager: own each product area from the ambiguous problem to the shipped feature. Built Duo's in-house ERP from zero to daily use across 9 hospitality locations, 13 modules, 6 roles and 40+ document types.
- Lead discovery: user interviews and usability tests with staff and managers, usage data and operator feedback, turned into problem statements, prototypes and validated designs.
- Design for complexity: dense data views, system behaviour, states and edge cases mapped across multi-step workflows in procurement, inventory, logistics, staffing and finance.
- Make complex data readable: a three-state status layer (ok, warn, critical) reads at a glance, role-based access cut onboarding time by about 30 percent, and a redesigned goods-receiving flow cut inventory errors by about 35 percent.
- Built and maintain the Figma design system of components, variables and tokens, and build the same components in Next.js, so each one has defined structure, behaviour and rules in design and in code.
- Shape product direction instead of executing handed-down requirements. Use Claude Code daily for rapid high-fidelity prototypes, and designed AI-assisted flows with a person kept in the loop.
- Joined Duo in June 2024 as a working student during the MA and moved into product design in October 2024.

TaurusWebs, Product Designer

Bogota, Colombia / Remote freelance / October 2024 - Present

- Freelance with the studio since 2019, about 10 hours a week alongside full-time roles: 0 to 1 product work for clients across Latin America and the USA, several projects in parallel, personally accountable for discovery, design and delivery on each.
- Led the design of the Taurus Ecosystem, integrating a CRM, a knowledge base and encrypted chat, the tooling support teams work in, into one platform behind single sign-on, with access control and data ownership as design constraints.
- Owned the whole process, from discovery and information architecture to user flows and stakeholder presentations, working with product managers, engineers and clients.

EDUCATION

University of Europe for Applied Sciences
MA, Visual and Experience Design
November 2023 - August 2025

Politecnico Grancolombiano
BA, Marketing and Advertising
February 2015 - March 2019

CERTIFICATIONS

Anthropic
Claude Code in Action
April 2026 / ID hyx4hjandy5c

Anthropic
Introduction to Agent Skills
May 2026 / ID 8gkk3jtb3sgt

SKILLS

DESIGN AND CRAFT

Product Design
UX / UI Design
Interaction Design (IxD)
Data Visualization
Data-Rich and Highly Visual Interfaces
End-to-End User Journeys
System Behaviour, States and Edge Cases
Information Architecture
Design Systems (Component Building)
Rapid High-Fidelity Prototyping
Accessibility and Inclusive Design (WCAG)

LANGUAGES

Spanish (Native)
English (C1, Professional)
German (A2, Elementary)

EXPERIENCE CONTINUED

TaurusWebs, Junior Product Designer

Bogota, Colombia / Remote freelance / February 2022 - September 2024

- Moved from interface design into product design, focusing on user flows and interactive prototypes.
- Worked closely with engineers to improve usability on B2B platforms and commercial SaaS products, running iterative cycles that kept solutions user-centered while meeting business goals.

TaurusWebs, User Experience Designer

Bogota, Colombia / Remote freelance / February 2019 - January 2022

- Rebuilt bulk data entry for livestock farms: loading a 70-animal farm went from about 6 hours to about 1 hour, and per animal from 5 minutes to under 1 minute.
- All new farms onboard through the bulk flow and 98 percent of tracked farms migrated to it; reporting to Fedegan (Colombia's national cattle federation) went from about 167 hours to under 33 hours per month.

Greens Supermarket, Senior Graphic Designer

Swieqi, Malta / On-site / September 2021 - November 2023

- Led visual identity and digital design across three food brands in the Greens Group: Greens Supermarket, Fresh To Go and Blok Foods.
- Designed and launched several brand websites, led the identity system across typography, photography, video, animation and packaging, and built the guidelines that held output consistent across the creative team.

Sanitas Medical Center, Lead Animator

Colombia / Freelance / February 2019 - May 2019

PROJECTS

Finanzas Familiares, Product Designer and Developer

Berlin, Germany / Self-initiated / July 2025 - Present, live at finanzas.juliang.de

- Designed and built with Claude Code a household finance progressive web app in daily use: dashboard, budgets per category, bills, subscriptions and planner over about 595 transactions.
- Connected two banks through Open Banking, importing every 3 hours, and replaced magic-link sign-in with a 6-digit code after the link kept opening a session outside the installed app. React, TypeScript and Vite on Supabase, on Vercel.

NotchTunes, Product Designer and Developer

Berlin, Germany / Self-initiated / July 2025 - Present, macOS app

- Designed a music widget that lives in the MacBook notch: collapsed it is the artwork and a three-bar equalizer, and hovering opens transport, scrubbing and volume.
- Unified four players behind one interface. Controls the system silently refuses are verified on the next poll and dimmed, so the interface never lies about state.

SKILLS CONTINUED

RESEARCH AND VALIDATION

User Interviews
Problem Framing
Insight Synthesis (Qual and Quant)
Usability Testing
Data-Informed Design Decisions

PRODUCT AND TECHNOLOGY

B2B and Productivity Software (SaaS)
AI-Powered Product Design
AI-Assisted Prototyping
Data-Heavy Products
Reusable Patterns and Components
Design Engineering

TOOLS

Figma, FigJam
Next.js, React, TypeScript
HTML, CSS, JavaScript
Claude Code, Gemini, NotebookLM
Adobe Creative Suite

WAYS OF WORKING

End-to-End Ownership
Cross-Functional Product Teams
Shaping Product Direction with PM
Design-to-Code Handoff
Design Critiques and Feedback
