PROFILE

Product Designer based in Berlin with a Master's in Visual and Experience Design from UE Berlin and 8+ years across product, brand, and visual design. I focus on **B2B SaaS, internal tools and data-heavy interfaces**, work where dense information has to feel calm and usable. My differentiator: I design products I also use myself. The ERP I designed and shipped at Duo Sicilian Ice Cream is in daily production across nine locations, six departments and 23+ staff, and I'm one of the operators using it. That tight feedback loop shapes how I work end-to-end: research, information architecture, Figma, design systems, prototyping, and shipping with engineering.

EXPERIENCE

Product Designer | Duo Sicilian Ice Cream, Berlin

Oct 2024 – Present

- Designed and shipped Duo's internal ERP from zero, now used daily across **9 locations and 6 departments** (operations, logistics, production, HR, finance, management).
- Owned the full product process end-to-end: discovery interviews with each department, information architecture for 40+ document types, wireframes, interactive prototypes in Figma, high-fidelity UI, design system, dev handoff and post-launch iteration.
- Designed a **role-based access model** with six distinct roles so each user only sees the data they own — reduces onboarding friction and prevents accidental edits across modules.
- Built a three-state status system (ok / warn / critical) applied consistently across inventory, expiring items, HR compliance, deliveries and production. Critical items are always surfaced, never buried.
- Shipped 13 modules: dashboard, inventory, flavours & stock, expiring items, movements, orders, deliveries, logistics GPS, suppliers, production, staff, reports and settings.
- Use the system daily as one of the operators, which creates an honest, continuous feedback loop with the rest of the users.

Product Designer | Cabezona Casa Creativa, Bogotá (remote)

Oct 2017 – Present

- Lead designer for internal SaaS tools and client-facing applications built from scratch.
- Designed the **Taurus Ecosystem**, a unified B2B workspace combining a CRM (Twenty), knowledge base (AppFlowy) and encrypted chat (Matrix), all tied together through a single SSO identity. Owned discovery, IA, user flows, Figma UI, prototype, and stakeholder pitch.
- Translated complex technical and infrastructure decisions (data sovereignty, hosting, security) into clear product narratives that non-technical stakeholders could sign off on.
- Cross-functional work with PMs, engineers and clients across multiple parallel projects on tight timelines.

Design Lead | Greens Supermarket, Swieqi, Malta

Apr 2021 – Nov 2023

- Designed and shipped multiple brand websites for the supermarket chain, from concept to live deployment.
- Built a multi-channel design system across web, photography, video, animation, packaging and in-store communications, keeping a multi-person creative team consistent across parallel campaigns.
- Led the visual identity strategy and managed design workflows end-to-end.

EDUCATION

MA Visual & Experience Design, UE University of Applied Sciences, Berlin

2023 – 2025

S K I L L S & T O O L S

Design	Product Design · UX/UI Design · Interaction Design · Information Architecture · End-to-end Product Design · Systems Thinking · Visual Design
Process	User Research · Usability Testing · Discovery · JTBD · Wireframing · Prototyping · Design Systems · Design Tokens · Accessibility (WCAG 2.1 AA)
Tools	Figma · Framer · Adobe Creative Suite · HTML & CSS · Next.js (basics) · Notion · Linear
Domains	B2B SaaS · Internal Tools · Data-heavy Interfaces · CRMs & ERPs · Brand & Web
Collaboration	Cross-functional Work · Agile · Stakeholder Management · Pitch Decks · Dev Handoff
